IN-CAN EQUIPMENT

Dromont provides turn-key integrated plants as well as ancillary equipment including denesting, label printing and application, automatic lidding, robotic multiple mixing station, palletizer and the related software and hardware complete control system.

DECORATIVE AND INDUSTRIAL PAINT ON DEMAND

Complete process from empty cans to finished goods. Dromont produces dispensing machines that dose all the components into empty cans and/or pails. These containers also function as the final shipping container. This allows for rapid, low waste and low cost manufacturing of custom products without the need to carry finished goods inventory. This technology integrates complete handling lines including labeling, agitation and palletizing.

Multiple Stirring

Color Tinting

Dispensing of bases

In-Line-color label printing and application

De - Palletizing of Empty Containers

Fully Automated Palletizing

Label application

Automatic Lidding
