SELECTA

AUTOMATIC IN-BATCH & IN-CAN TINTING

- Available in 3 models, 48, 64 or 100 valves
- Valve Sizes are 1" and 2"
- Highest accuracy in the market of 0.01 grams (depending on product viscosity and scale type)
- Flow rate of 3000 litres/h. with 1" valves
- Flow rate of 9000 litres/h. with 2" valves
- Range of Dosage Containers from 1 kg. to 3000 kg.
- Specific offset valves available

ADVANTAGES

- Highest level of Technology
- Special patented design allows for central dispensing of all components
- Highly beneficial when custom colors are required
- Very efficient color matching, automatic sampling and scale-up to production
- In-batch, In-can and Laboratory Dispensing
- This technology integrates complete handling lines including labeling, agitation and palletizing
- Selecta combines laboratory and production technology in one plant while sharing the same raw material storage
- Expandability of valves on the same footprint
